Subject: RE: Sub slan sample results shared with Kozaks

Kristen,

I spoke to Mrs. Kozak last week and let her know that I would be sending the results from all our sampling in March, so you won't need to do that.

I have not yet received a written response from our risk assessor on the results but will ask for one so I can send that along also. I would prefer that we keep the write-up I provided for the meeting within our group, because the portion on air sampling results was written by me and not our risk assessor.

Thanks,

Bob

Subject: Sub slan sample results shared with Kozaks

Good Morning Bob,

I am preparing a response to the Kozak's letters shared at last week's meeting. I also need to provide them results from the most recent sampling events. Do you have any evaluation of their subslab sample results other than what was presented in your status update. My plan is to provide the information in your status update. Please let me know if your comfortable with me sharing the air sampling results with the Kozak's and if there is any additional information or risk assessor reports I should include.

Thanks,

Kristen Hanson
